

I'm a senior engineering leader with 20+ years of experience in full-stack development, systems architecture, and team management across industries like eCommerce, finance, energy, and manufacturing. I specialize in scalable platforms, API design, CIAM/IAM security, and multi-system integrations. I've led cross-functional teams, delivered complex products, and built secure, high-performance systems in cloud-native environments.

I'd welcome the opportunity to contribute my experience and leadership to your engineering team. Thank you for your consideration.

Sincerely,

Jason Laumeister
